ANSWERS

1. Anything you can scribble on: stone, clay, tree bark, metal sheets, bones.
2. Ancient Egyptians. It was called papyrus.
3. It was Roman Codex.
4. Stronger material: usually wood or leather.
5. It was cheaper, lighter and more durable.
6. China
7. Bookmakers no longer needed to break their backs handwriting page after page. The printing press could spit out about 3000 pages every day.
8. Nowadays books are printed on big oversized sheets of paper. Those sheets are sliced down smaller and then divided into organized stacks. Those stacks are folded in half and sewn together. The folded and sewn stacks are cut down to the final size and glued to the spine of the book.
